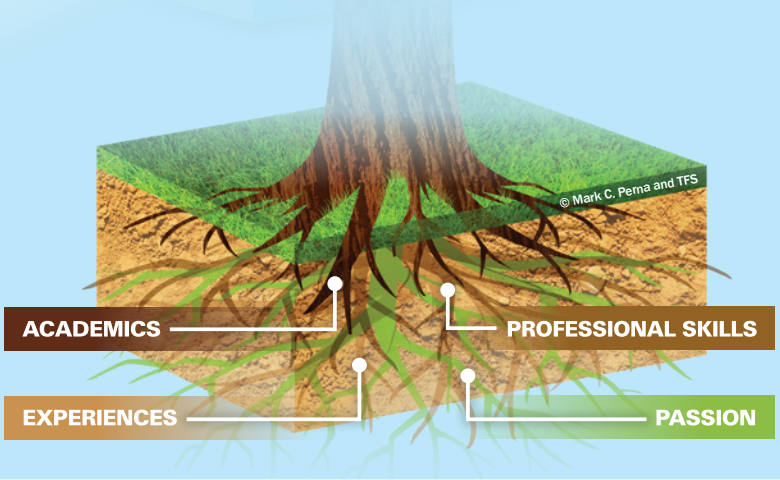
CAREER TREE® ROOT SYSTEM CAREER PLAN

NAME: Ethan Spearing

ACADEMICS
Subjects and academic performance needed to enter the next level of education and reach career goals

EXPERIENCES
Time spent in hands-on, career-related activities: internships, apprenticeships, networking, job shadowing, volunteer opportunities, industry expert interviews, and more



PROFESSIONAL SKILLS
Personal attributes to succeed in the workplace: work ethic, communication, ability to accept feedback, confidence, leadership, flexibility, integrity, work-life balance, punctuality, stress management, and more

PASSION
Strong desire and commitment to achieve goals: resilience, perseverance, planning skills, motivation, resolve, energy, courage, grit, and more

MY CAREER GOAL/FIELD: Video game developer

Create your personal plan of study below to achieve the career and lifestyle you want.

MY ACADEMICS

- What academic subjects will you need to focus on in order to reach your career goal?
- What level of education/training is required to reach your chosen career? (Industry certification, degree, license, etc.)
  Bachelors degree in game design, computer science or software engineering with certifications in programming languages like C++ and C#
- What are your postsecondary/further education options? (college, technical training program, etc.)
  Community college for 2 years and then transfer to Ferris university to get my bachelors in game design
- How much will your postsecondary/further education cost? $40,000-$45,000
- If you will be taking out loans, how much will you need to borrow? $30,000 to $60,000
- What companies offer tuition assistance for their employees? Electronic arts, Microsoft, apple, game changer.

MY EXPERIENCES

- What experiences will help you discover more about your chosen career? (part-time jobs, volunteering, on-site job visits, etc.)
  hands on technical practice, creative collaboration, and networking
- How will hands-on, career-related activities benefit you? gives me experience to have on my resume and give me a sense of how the job will go
- If your field offers volunteer/internship/apprenticeship opportunities, where would you like to experience this?
  I would like to experience it in the actual work place to get a sense of the job and being able to have others who could possibly help me

CAREER TREE® ROOT SYSTEM CAREER PLAN

NAME: Ethan Spearing

MY PROFESSIONAL SKILLS

- What professional skills do you feel you already possess?
  creativity,collaboration skills,teamwork, and programming experience
- What types of professional skills are most important in your chosen career?
  technical programming proficiency with engine expertise and creative abilities like design, animation, and UI/UX
- Are there any professional skills listed in the root system where you will need to grow?
  my technical proficency with engine expertise and probably my communication skills
- How can you practice your professional skills in the classroom and in career-related experiences?
  my working on projects with my classmates and having game design experience

MY PASSION

- What is exciting to you about your chosen career?
  being able to make something I love so much and take my creative ideas and bring them to life
- What kind of lifestyle will your chosen career help you to enjoy?
  A normal happy life where I have everything I need to feel happy
- How can you create a competitive advantage that sets you apart in your career field?
  by making myself work twice as hard add my thoughts and express my concerns if something in the game does not feel or look good
- How will you re-motivate yourself when your goal seems distant or difficult?
  I will remind myself why I wanted to do this job and probably play a video game to remind me why I love video games so much

When I complete my program, I plan to:

Pursue further education/training (if applicable) at: go to college and gain experience needed for this career

Finance my further education/training through: loans

Complete my program of study and/or begin my career by this date: Fall of 2026

Pursue career-related experiences at these places: game developement studios or use game developement related applications

Use the following career-related experiences on my application/resume: Game design project at OSTC NE computer programming program
